## Welcome to As Sabiqun Montessori

At As Sabiqun Montessori, we believe education is and should be more than academics. It's about holistically nurturing a child. Here, learning begins with faith and blossoms into confidence, compassion, and character.

Our name, As Sabiqun, means “The Forerunners”; it means those who lead with goodness, faith, and purpose.

That is what we strive to nurture in every child: leaders who carry their values proudly, wherever life takes them. Especially when you aren't there.

### Our Philosophy

We combine the timeless Montessori method with strong Islamic values to create a calm, engaging, and faith-centered learning environment.

Every child learns at their own pace — guided, not pressured; encouraged, not compared.

Through hands-on experiences, gentle routines, and meaningful guidance, children grow in independence, curiosity, and character.

“We believe education should shape both the mind and the soul.”

### Our Vision

To build a generational community where children grow in faith, character, and service — becoming confident Muslims who lead with integrity and compassion.

### Our Mission

To provide holistic education rooted in Islamic principles and Montessori practice, nurturing lifelong learners who love knowledge, serve others, and live with purpose.

### Our Core Values

#### Faith:

Centered in everything we do.

#### Character:

Teaching kindness, honesty, and discipline through example.

#### Service:

Inspiring children to give, help, and make a difference.

#### Community:

Building strong relationships with families and teachers.

#### Simplicity & Beauty:

Creating calm, natural spaces that inspire learning.

### Programs

#### Early Years 3 Months – 6 Years

The foundation of a child's life. We provide a nurturing, faith-guided environment where your child learns language, movement, independence, and responsibility through play and purposeful activity.

#### After School Weekend Programs

Designed to reinforce classroom learning and connect faith with daily living. Activities include Quran reading, creative arts, language enrichment, and moral education.

#### Parent Community Engagement

We believe parents are a child's first teachers. Through workshops, family days, and community programs, we support families in creating environments of love and learning at home.

### Our Environment

Our classrooms are peaceful, bright, and filled with natural materials that invite curiosity.

Each space is carefully designed to help children develop focus, confidence, and a love for learning.

Children learn practical life skills, care for their environment, and experience the joy of helping others — all within an atmosphere of faith and respect.

### Our Teachers

Our educators are trained in Montessori philosophy and grounded in Islamic values.

They serve not just as teachers, but as guides — observing, supporting, and encouraging every child to discover their own potential.

We believe that when teachers nurture with sincerity, children flourish with confidence.
